SUMMARY

Full Stack Developer with 1.5+ years of commercial experience in PHP and JavaScript, building REST APIs, system integrations, and working in an AI-first development model (Claude Code). Also builds personal projects in Python (FastAPI, Django).

PROFESSIONAL EXPERIENCE

Full Stack Developer | Telemedi, Warsaw, Poland (remote)

Jun 2026 - Aug 2026

Digital health platform - telemedicine and occupational medicine for businesses.

- Designed and developed a payment refund dashboard
- Implemented API endpoints for a voicebot handling voice calls with patients
- Independently scoped and delivered clinic partner integration configuration
- Worked in an AI-first developer model - Claude Code as the primary implementation tool

Full Stack Developer | eGodziny, Gdańsk, Poland

Jan 2025 - Apr 2026

SaaS platform for employee time tracking and workforce management.

- Developed and maintained core admin panel features (PHP, JavaScript, HTML, CSS)
- Extended REST API; implemented JWT authentication, CORS, and rate limiting
- Built a landing page in React with API integration and form validation
- Implemented data exports (Excel, PDF), work schedules, and email notifications
- Supported onboarding of 3 interns and conducted pull request code reviews

Mobile App Developer | Kościerzyna Specialist Hospital, Poland

May 2025 - Dec 2025

Mobile app for indoor hospital navigation via an interactive map

- Co-developed a React Native (Expo) mobile app in a 3-person team
- Handled technical coordination, requirements gathering, and stakeholder communication
- Planned project architecture, task breakdown, and team workflow
- Implemented Dijkstra's algorithm for in-hospital route calculation

PROJECTS

NomNom - PWA calorie tracker

fit.spryszynski.pl

- Progressive Web App for calorie tracking - meal recognition from photos and text descriptions, plus AI-generated weekly meal plans, using Claude Haiku for text parsing and Claude Sonnet for photo analysis and plan generation
- Backend in FastAPI + PostgreSQL, deployed via Docker Compose with automated CI/CD (GitHub Actions) on a self-managed VPS

Flight Scope - flight tracking web app

flights.spryszynski.pl

- Full-stack app inspired by FlightRadar (FastAPI, React, TypeScript, PostgreSQL, Redis)
- Real-time geolocation visualization (Deck.gl); architecture designed for scalability

Song Recommendation System with Spotify integration

spotify.spryszynski.pl

- Music recommendation system in Python (Django, Pandas, NumPy, Scikit-learn) on a dataset of 100k+ tracks
- Spotify API integration (OAuth 2.0) with a kNN model for track recommendations and playlist generation

EDUCATION

WSB Merito University in Gdańsk, graduated February 2026

Bachelor of Engineering in Computer Science (specialization: Programming)

Engineering thesis: hospital indoor navigation mobile app (grade: 5/5)

SKILLS

Languages & frameworks: Python (FastAPI, Django), PHP (Symfony), JavaScript/TypeScript (React, React Native)

Databases & DevOps: PostgreSQL, MySQL, Redis, Docker, Kubernetes, Argo CD, CI/CD, GitHub Actions, Nginx, Linux, GCP (basics)

APIs, tools & AI: REST API, JWT, OAuth 2.0, Git, Jira, Claude Code (AI-first development), Cursor

Other: OOP, Algorithms, Machine Learning (Scikit-learn, Pandas, NumPy), Agile/Scrum, English (C1), Polish (native)
