WORK EXPERIENCE

Full Stack Developer | eGodziny, Gdańsk

JAN 2025 - APR 2026

SaaS platform for employee time tracking and workforce management.

- Developed and maintained core features of a web-based admin dashboard using PHP, JavaScript, HTML & CSS
- Built and extended REST API, implementing JWT authentication, CORS and rate limiting
- Developed React-based landing page with API integration and form validation (email and phone verification)
- Developed data exports (Excel, PDF), work schedule, email notifications and event logging
- Helped onboard 3 interns, reviewed their pull requests and answered technical questions

Mobile App Developer | Specialist Hospital, Kościerzyna

MAY 2025 - DEC 2025

Mobile navigation application developed for a specialist hospital to locate departments using an interactive map-based interface.

- Co-developed a React Native mobile application using Expo for hospital navigation as part of a 3-person team
- Acted as a technical coordinator, gathering requirements and communicating directly with hospital stakeholders
- Planned project architecture, task breakdown and development workflow for the team
- Implemented pathfinding functionality using Dijkstra's algorithm for route calculation within the hospital
- Reviewed code and ensured quality, consistency and alignment with project requirements across the team

PROJECTS

Flight scope - flight tracking web app

flights.spryszynski.pl

- Developing a full-stack web application inspired by flight radar systems using FastAPI, React, TypeScript with PostgreSQL and Redis
- Implementing real-time geospatial visualization of live flight data using Deck.gl and designing system architecture for scalable data handling

Spotify music recommendation system

spotify.spryszynski.pl

- Built a music recommendation system using Python, Django, Pandas, NumPy and Scikit-learn based on a dataset of 100k+ tracks
- Implemented Spotify API integration with OAuth 2.0 authentication and developed a k-Nearest Neighbors (kNN) model to recommend similar songs using audio features, enabling playlist generation

EDUCATION

WSB Merito University, Gdańsk, Poland, graduated in February 2026.

Bachelor of Engineering in Computer Science (Programming specialization)

Final project: Hospital navigation mobile application (grade: 5)

SKILLS

Languages: Python, PHP, JavaScript, TypeScript

Frontend: React, React Native, HTML, CSS

Backend & DB: Django, FastAPI, SQL, MySQL, PostgreSQL, Redis

APIs & Tools: REST API, JWT, OAuth 2.0, Git, Docker, CI/CD, Linux, Jira, Nginx, GitHub Actions

Other: OOP, Algorithms, Machine Learning (Scikit-learn, Pandas, NumPy), Agile/Scrum

Languages (spoken): English (B2/C1), Polish (native)
